PROFILE

After 14 years of work in key account management and project leadership, I decided to embrace a geeky part of my nature and transition to the world of coding. My drive to learn new things and passion for emerging technologies, combined with my newly acquired programming skills, has empowered me to create valuable solutions. During my career, I have developed a strong ability to quickly adapt to new technologies and solve challenging problems. My background in data analysis, customer service, and process improvement equips me to become a contributing team member.
